DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of claims 7-9 in the reply filed on 6/30/04 is acknowledged. The traversal is on the ground(s) that no separate search is required. This is not found persuasive because the Examiner specified a particular example of subclasses that would require separate searches for the separate claimed inventions. The searches do not necessarily encompass each other, as Applicant suggests, since they would not both be searched had only one of the inventions been claimed.

The requirement is still deemed proper and is therefore made FINAL.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1754

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 7-8 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3 of U.S. Patent No. 6,251,348. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to one of ordinary skill in the art at the time the invention was made to claim a mixture of iron oxide/hydroxide and/or zinc oxide/hydroxide because the '348 patent claims iron oxide, zinc oxide, or combinations thereof (see claims 1-3).

4. Claim 9 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3 of U.S. Patent No. '348 in view of Paull et al. US 4,014,982. It is considered that it would have been obvious to one of ordinary skill in the art at the time the invention was made to claim a mixture of manganese oxide, as disclosed in Paull, in place of the iron oxide in the compound of the sulfur removal process of Patent '348 because Paull discloses his manganese oxide for use in a compound for the removal of sulfur dioxide (abstract) to process large volumes of noxious industrial effluent efficiently without recycling impurities or

requiring addition of chemicals not inherent to the process (see column 3, lines 55-60).
